

Flextur Mobile Welding Table Cart

This new cart is great for On-the-go Welding and Robotic/Cobot applications. The cobot arm can be attached to the welding cart or you can use this cart or any of the Flextur family of workstations at a Robotic work cell to maximize productivity and efficiency.

- Made In USA
- 1,750lbs. Mobile Capacity
- Gridlok for Storage and Organization
- In Stock and Ready to Ship

Mobile Welding Table Cart
with 42 Piece Fixture &
Gridlok Accessory Kit

Mobile Welding Table Cart
for Cobot Applications

Flextur Integrates with Robot/Cobot Companies to Provide Automated Welding Cells

Flextur tables and carts are durable and stable enough to hold any robotic arm. And by utilizing Gridlok Tool Board, Flextur can provide maximum efficiency and throughput and to help solve for labor and skill shortages.

Flextur partners with companies such as Yaskawa, OTC, BOTX, Lincoln Electric, KC Robotics, and many others.

Flextur welding tables are
American Made in Dalton, Ohio U.S.A.

Welding Tables

American Made Industrial Strength Welding Tables Featuring Gridlok

As an industry leader or hands-on welder working in manufacturing and metal fabrication, you're always looking for greater efficiency throughout the fabrication process. Increasing productivity, reducing waste, and lowering costs are daily challenges.

Flextur Workstations and Weld tables are engineered for Lean and 5S workflows.

Flextur industrial welding tables and workstations are the industry's only to feature Gridlok - the strongest, most versatile 14-gauge metal pegboard for organizing tools and materials, putting efficiency within reach. Our patented design features Industrial hooks capable of holding up to 50lbs

Interlink & Synchronize Your Facility Outfit Your Facility for Maximum Productivity

As a manufacturing leader, you face many challenges such as labor shortages, skill gaps, production deadlines, and financial and quality goals. And an unorganized workplace causes excess waste of materials, motion, and time spent searching for lost or misplaced tools.

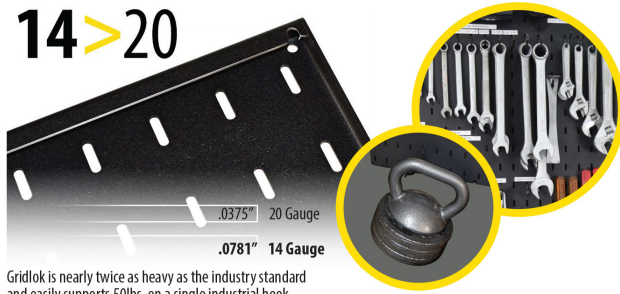

By interlinking and synchronizing your facility, you will decrease labor and material costs, improve product quality, and organize your tool and material storage while enhancing 5S, Lean, and OSHA compliance efforts providing a safer working environment for your employees and visitors.

14 > 20

Gridlok is nearly twice as heavy as the industry standard and easily supports 50lbs. on a single industrial hook.

Gridlok Metal Pegboard / Tool Board

The Industries Strongest, Most Versatile 14-Gauge Metal Pegboard And Tool Board Organizer

Gridlok™ Metal Pegboard / Tool Board provides the organization and standardization necessary for successful Lean and 5S initiatives and aids your efforts at improving productivity, eliminating waste, reducing costs, and increasing efficiency. Industrial hooks capable of holding up to 50lbs

★★★★★
"The Yaskawa team chose to work with the Flextur® team, as they are very agile and responsive, with great engineering recommendations for welding applications with the Yaskawa Motoman Robotics. Both the Yaskawa and Flextur teams have worked well together."

Josh Leath
Yaskawa American, Inc., Motoman Robotics Division,
Senior Product Manager, Welding
